Simple Moon Floower

Special Instructions

1. The leaves shown in black on the cover photo are optional. The pattern is drawn as the simpler design with the optional black leaves shown separately from the rest of the pattern. If you choose to make the simpler design, just follow the moon part of the pattern drawn in black lines and disregard the extra leaf shown in grey.

2. If you wish to add the additional leaves, the template for these are shown in grey on the pattern. These leaves can be achieved a few different ways.

a) You could use wire to create the shapes of the leaves and fill them with solder.

b) The leaves could also be made using solid copper craft sheeting. Simply cut out the shapes and solder the leaves onto a wire stem.

c) The leaves and stem could be painted on using glass craft paints. You would need to curve the stem design a little more to ensure that the all of the leave fit entirely over the glass of the moon.

d) Foil overlay could be used to create these extra leaves. Again, the stems would need to curve a little more to ensure the leaves were entirely on the surface of the moon and not hanging over the edges.
